

Project:
Starbucks
Barista area

Eco-Grip is a revolutionary flooring product that is utilized in areas demanding a safe, waterproof, slip-resistant environment. Eco-Grip has benefits not found in other conventional flooring materials. Have a look and see why so many restaurants, bars, hotels, schools, grocery chains, vet clinics, equestrian facilities and military installations are using Eco-Grip. You will like what you see, and more importantly, what you feel!

Slip Resistant and Waterproof:

Eco-Grip has one of the highest slip resistant ratings available. Measured as the Coefficient Of Friction (COF), this monolithic waterproof flooring system has a very high rating both wet (1.07) and dry (1.31), even after years of use. Easily coved up the wall creating a unified baseboard, Eco-Grip prevents any moisture from ever leaving the space.

Reduces Bacterial Growth:

Eco-Grip repels grease, animal fats, cooking oils, chemicals, odors, stains, and weather, virtually eliminating the opportunity for bacteria to take hold and grow. This also makes the product very easy to clean.

Reduces Fatigue:

The comfort and added thickness of Eco-Grip flooring provides relief to feet and backs directly contributing to improved health and productivity.

Impact and Puncture Resistant:

Dropped a knife? Don't worry. The floor is self-healing. With a thinner floor you would have a broken membrane. Not with Eco-Grip. It is virtually indestructible. Designed to withstand the daily abuse of industrial and commercial settings.

Sound Absorption:

Busy environments become a quieter oasis with this thicker flooring under foot. Ambient noise is absorbed and significantly reduced.

Chemical Resistant:

Proven to withstand many types of chemicals, Eco-Grip resists stains and will not harbor odors. Eco-Grip exceeds OSHA and ADA requirements in every area.

Stable performance:

Eco-Grip does not shrink, curl, peel, pull away from walls, or wear out like other less durable flooring products.

Stress-free installation:

Eco-Grip can be installed after-hours for use the next morning. Larger projects are installed in stages eliminating costly interruption of business. Walk on it right after install with no loss of revenue. With Eco-Grip you are never shut down!

Green product:

Manufactured from post-industrial recycled polyvinyl, Eco-Grip reduces the impact on landfills while adding to your LEED points.

Warranty:

Eco-Grip provides a 10 year manufacturer's warranty when combined with the Eco-Grip Floor Cleaning System.

Choice of colors:

Eco-Grip comes in 7 attractive colors to complement your environment with custom colors available.
